Description 1

There are so many helpless animals in worldwide today They suffer from injury or disease and need treatment. Also, There are many animals that need a caregiver and should be kept. Fortunately, there are many people in the world who are thinking of helping injured or helpless animals. But they can't find injured and helpless animals or fall victim to scams by websites that claim to support animals. It's very upsetting that the donor is losing money and homeless or sick animals are not cured and live with suffering or unfortunately died in pain.

Basic problems of animals and donors 2

1. People can't find animals that need emergency help.
2. Donors fall victim to scams.
3. Animals that need help are destroyed.
4. Helpless animals cannot be helped in other countries.
5. Animals are part of nature and by destroying them, part of nature is destroyed.

Platform **3**

1. Brief introduction

Animal Protection Service with new solutions and dedicated "APS" tokens to help animals and secure payment.

2. Ideology

Animal protection service is based on clarification and with new strategies in disseminating information and documents on the treatment and protection of animals, It also prevents any scams by informing you about the treatment process.

3. Notices and news

The communication department of the animal protection service is online and communicates with the contacts through the website.

News is published via Official Twitter account (@apscoin)

Activities⁴

1. APS operates in 3 main sections

1. Treatment and health of helpless animals.
2. Feeding animals that need to support.
3. Caring for animals that need to be cared for urgently required.

2. Methods

1. People can find animals around them that need help in any country and wherever they are and:
 - Take to veterinary clinics or veterinarians with a valid ID.
 - Contact us through a doctor or clinic and take the photos we need and send them to us.
 - Share medical records and cost documents with us.
 - Provide us with the information of the doctor or clinic and medical records directly.
 - Inform us about the treatment process and send the required documents for public review after the treatment.

We check the accuracy of the treatment case with correspondence, research and reviews on the website and social media and LinkedIn related to the doctor or veterinary clinic, and if it is honest and correct, we will display this case publicly on our website so that people who want to help for treatment Pay the donation through the "Animal Protection Service" token, Donors will be notified of the treatment of the animal after the treatment period.

2. We have a team that finds the animals that need help and treatment, and after determining the treatment process, we put their files on the website so that you can easily see them for treatment and help with the “APS” token if you decide to help and after the process of treatment and recovery of the animal, you can see it in health on the website.

Note: If more tokens are collected for one case than its treatment and maintenance costs, the remaining tokens will be charged for the next case costs.

Effectuality and Goal5

1. Betterment life

**In the first, the Animal Protection Service intends to prevent any harm to animals and nature
So that the animals can live in peace, health and hygiene.**

Animal health certainly have a great efficacy on improving human life.

2. Emergency assistance

**Donors can find emergency cases in worldwide on the Animal Protection Services website
so help the most needy helpless animal cases,
this procedure treats the animals that were the priority.**

3. Prevent scams

**Animal Protection Service prevents scam by checking required animals,
medical records, treatment process and veterinarians and clinics that accept animals.**

APS Token⁶

Animal Protection Service Token is a safe and secure way to transfer treatment costs between donors without restrictions and with the possibility of transferring in worldwide. APS tokens for easy and secure payment, clarification of financial transactions and checkability of payment accounts has been created. so for helping, animal protection service it's only possible through the "APS" token.

The APS token is open source and based on the TRON network. to prevent any abuse and scam, token codes have been published in GateHub and Tronscan so visible for public review.
